1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Stephanick et al 2005/0283358. Stephanick discloses a method of entering text using a numeric keypad with associated letters to the number keys. It is disclosed in [0029]-[0031] that the first character is entered by depressing a number key a multiple of times. Successive characters are entered in the same manner. It is disclosed that upon entering of each successive character a word list is compiled to associate most likely words to the character sets already entered.
